

CURRICULUM VITAE

NAME: Antonio **SURNAME:** González **NATIONALITY:** Spanish

DATE AND PLACE OF BIRTH: 08/05/1969; Salamanca, Spain

SEX: Male

CONTACT ADDRESS: Cell Physiology research Group (FICEL); Department of Physiology; Faculty of Veterinary Sciences; University of Extremadura; E-10003; Cáceres; Spain

Phone: +34 927 257000 (ext. 51377)

Fax: +34 927 2571510

e-mail: agmateos@unex.es

QUALIFICATIONS:

- a) D.V.Med. First Class Honours (1992) University of Extremadura
- b) V.M.Sci. (1992) Title of project: "Characterization of the secretagogue effects of acetylcholine on the exocrine pancreatic secretion in the rat". University of Extremadura
- c) Ph.D. First Class Honours (1996) Title: "Ionic mechanisms of coupling in exocrine pancreatic secretion". University of Extremadura

SPECIALIZATION: Cell Biology and Physiology

CARRIER/EMPLOYEMENT:

1989-1992 Undergraduate student in the Department of Physiology, Faculty of Veterinary Sciences, University of Extremadura.

1990-1992 Research Student, Department of Physiology, Faculty of Veterinary Sciences, University of Extremadura.

1993-1996 MEC (Spanish Ministry of Education and Science) Research Fellow, University of Extremadura.

1997-1998 Post-doctoral Training in a foreign country. Acciones de Preparación al Plan Regional de Investigación. Cosejería de Educación y Juventud. Junta de Extremadura.

1999 Scientific Assistant, Department of Physiology II, Faculty of Medicine, University of Saarland.

2000-2001 Return Grant, Sistema de Ciencia-Tecnología-Economía-Sociedad de la Comunidad Autónoma de Extremadura (becas postdoctorales de Programa Propio). Acciones de Preparación al Plan Regional de Investigación. Consejería de Educación y Juventud. Junta de Extremadura.

2001-DATE Lecturer in Physiology, Department of Physiology, University of Extremadura, Cáceres (Spain).

2004-DATE Vice-dean for Academic Management and Studies Coordinator, Faculty of Veterinary, University of Extremadura, Cáceres, (Spain).

MEMBER OF PROFESSIONAL SOCIETIES:

Physiological Society Ordinary Member

Member of the Spanish Physiological Society

Member of the European Society of Neurochemistry

RESEARCH INTEREST:

I have 19 years of research experience. My specific interest is on Stimulus-Response Coupling. At the beginning of my research training I worked with anaesthetised animals focusing my research on the determination of pancreatic juice secretion and enzymes content. During my doctoral degree the studies were carried out in isolated pancreatic acinar cells both suspensions and single cell, using fluorescent probes (fura-2 and BCECF) for determinations of intracellular calcium and pH. During my postdoctoral training I have been working with confocal laser-scanning fluorescence technics, focussing the investigations onto the spatio-temporal aspects of calcium signalling.

My studies are also focused onto the role of mitochondria in calcium signalling and the physiology of the pancreatic acinar cells under oxidative stress conditions, employing confocal laser scanning microscopy, single (imaging) cell fluorimetry as well as spectrofluorimetry (cell suspensions studies).

In addition, actually I am carrying out studies on signal transduction in the central nervous system, hippocampus, based on cell cultures. My investigations employ astrocytes and neurones as cellular model. The techniques applied are as mentioned above confocal laser scanning microscopy, single (imaging) cell fluorimetry as well as spectrofluorimetry, conventional spectrophotometry, western blot analysis, and the research is focused onto oxidative stress and calcium signalling and cell function, and the role of antioxidants in cell physiology.

TECHNIQUES:

Fresh cells preparation techniques; fluorimetry (cell suspensions); microspectrofluorimetry (single cell); confocal laser-scanning microfluorimetry; western blot; determinations of digestive enzymes secretion (amylase and tripsinogen); “*in vivo*” assays with anaesthetised animals (rat and guinea pig); little knowledge of HPLC and molecular biology techniques; cell culture.

LANGUAGES: Spanish and English (fluent both languages); German (level G III DAAD); Italian (elemental level).

PUBLICATIONS:**1.- Books (I.S.B.N.)**

Title: Ionic mechanisms in pancreatic secretion coupling

Doctoral Thesis

Author: Antonio González

Editorial: University of Estremadura Publishers

City/Country: Cáceres /Spain

Year: 2006 I.S.B.N. 84-7723-702-6

Title of chapter: Apoptosis in nervous cells. Pp 93-128.

Title: Apoptosis: Involvement of Oxidative Stress and Intracellular Ca²⁺ Homeostasis

Author: Antonio González

EDITORIAL: Springer. 238 p.

Year: 2009 ISBN: 978-1-4020-9872-7

Eds. Salido, Ginés María; Rosado, Juan Antonio.

Title: Animal Physiology. Self-help questionary.

Authors: Antonio González and Ginés María Salido.

EDITORIAL: Fénix Editora, 148 p.

Year: 2010

ISBN: 978-84-614-5606-2

STAY IN FOREIGN LABORATORIES:

Place: University of Central Lancashire, Department of Applied Biology, Preston, U.K.

Period: September 1993, September 1994 (with Prof. Jaipaul Singh).

Purpose: training in spectrofluorimetry determinations.

Place: University of Newcastle upon Tyne, Department of Physiology, Newcastle upon Tyne, U.K.

Period: October 1994 (with Dr. J. I. Gillespie and Prof. B. A. Argent).

Purpose: training in microspectrofluorimetry techniques, imaging analysis.

Place: Universität des Saarlandes. II. Physiologisches Institut. Medizinische Fakultät. Homburg/Saar. Germany (with Prof. Dr. I. Schulz).

Period: November 1996.

Purpose: training in confocal laser scanning techniques.

Place: Universität des Saarlandes. II. Physiologisches Institut. Medizinische Fakultät. Homburg/Saar. Germany (with Prof. Dr. I. Schulz).

Period: two years; January 1997 - December 1998.

Purpose: postdoctoral stay.

Place: Universität des Saarlandes. II. Physiologisches Institut. Medizinische Fakultät. Homburg/Saar. Germany (with Prof. Dr. I. Schulz).

Period: one year; January 1999 - December 1999.

Purpose: Scientific Assistant.

Place: Universität des Saarlandes. II. Physiologisches Institut. Medizinische Fakultät. Homburg/Saar. Germany (with Prof. Dr. I. Schulz).

Period: Octobre-November 2003.

Purpose: training in molecular biology techniques

REFEREE/REVIEWER FOR THE FOLLOWING JOURNALS:

The Open Clinical Chemistry Journal (Board Member); Alcohol and Alcoholism; Applied and Environmental Microbiology and Journal of Bacteriology; Brain Research; Clinical and Experimental Pharmacology and Physiology; Free Radical Biology and Medicine; International Journal of Experimental Pathology; Journal of Affective Disorders; Journal of Experimental Biology; Journal of Neurochemistry; Journal of Physiology and Biochemistry; Neurochemical Research; Neurotoxicity Research; Pflügers Archiv-European Journal of Physiology; Toxicology.
